

Phase Sequence Tester

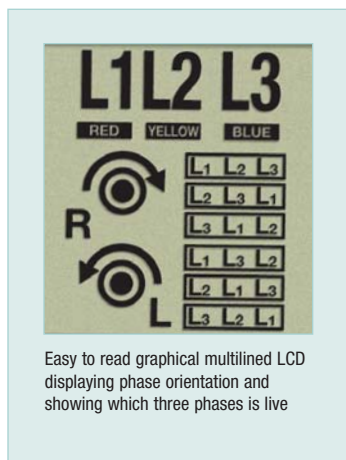

Checks phase sequence and phase status

Tests up to 600VAC and displays graphical phase orientation on the large LCD

Features:

- 40 to 600VAC rated test range for testing phase orientation of three phase power sources over 15 to 400Hz frequency range
- Graphical multiline LCD indicates phase orientation (clockwise or counter-clockwise) and whether each of the three phases is live
- No battery required
- Complete with cable, three large color coded alligator clips, and pouch case
